Sten and Manu are playing a board game. Help them to move their pieces around the game board, by counting on in equal steps, and filling in the missing numbers.
(1) 12, 16, $\quad, 24,28, \ldots, 36,40,44$,
(2) 16, 24, $\qquad$ ,64, 72, 80,
(3) $25,35,45$, $\qquad$ , $\qquad$ ,75, 85, 95, $\qquad$
(4) 50, 100, $\qquad$ ,350, 400, 450, $\qquad$
(5) 300, 400, $\qquad$ ,600, 700, 800, $\qquad$ , 1,000, $\qquad$
Find Sten's position on the game board, by answering the clue. Write the number in the space provided.

(6)
Sten's position is 10 more than 30 .
What is Sten's position?

0
Sten's position is 10 less than 29.
What is Sten's position?

$\square$

(8)
Sten's position is 100 less than 330.
What is Sten's position? $\square$
(9)

Sten's position is 100 more than 450.
What is Sten's position?

Sten's position has an 8 in the ones place, a 3
10 in the tens place and 2 in the hundreds place. What is Sten's position?

Now make up some missing number sequences of your own for your friend to solve. Count in steps of 4, 8, 10, 50 and 100.
